Profile

A highly motivated Full-Stack Developer specializing in MERN and Next.js. Experienced in building secure, collaborative web applications with modern frameworks and real-time features.

Education

NED University of Engineering and Technology
B.E. in Computer Systems Engineering

2022 – Present
Karachi, Pakistan

Major Projects

Sindh Universities And Boards Department – Official Portal

🌐 [Visit website](#)

- Developed a full-scale government portal under the directive of Secretary Muhammad Abbas, from scratch to deployment.
- Implemented a QR Code Verification System to eliminate fake notifications.
- Built role-based access control for Secretary and Admin.
- Created a centralized repository for all Sindh universities & boards.
- Added dynamic modules including Vacancies, Appointments, News & Events.
- Adopted by the Government of Sindh, serving thousands daily and enhancing transparency in education governance.

Fatima Trust Hospital Management System

- Designed a complete hospital management solution for mid-level healthcare institutions (Ahmed Fatima Trust, Hyderabad).
- Implemented patient registration, doctor appointments, billing, invoices, and reporting modules.
- Integrated pharmacy and medicine inventory management, laboratory test workflows, and dispensary data.
- Developed role-based access for Admin, Doctors, and Staff.
- Built with Next.js, TypeScript, Prisma, and PostgreSQL. Currently under process, soon to be deployed in production.

Research Workflow Management System – Final Year Project (In Progress)

- Building a platform to centralize fragmented university research workflows (emails, spreadsheets, shared drives).
- Features include structured submissions, versioning & audit trail, configurable multi-stage review workflows, and compliance automation.
- Implements repository & search across research outputs with researcher/project showcase pages.
- Includes a dedicated ORIC/Research Office module for managing compliance and approvals.
- Synchronizes research data with Sindh HEC for centralized monitoring.

Experience

National Center of Cyber Security (NCCS)

Development Intern

Sep 2024 – Nov 2024

Karachi, Pakistan

- Built a threat intelligence detector using Django, HTML, CSS, and JavaScript to analyze suspicious social media posts based on keywords.

Ztuth

Nest.js Trainee (Remote)

Jan 2025 – Feb 2025

Karachi, Pakistan

- Worked on a dental application using Electron.js for the frontend and Nest.js for the backend.

Orange Pro AI

Software Engineering Intern

Mar 2025 – Jun 2025

Karachi, Pakistan

- Assisted in applying core software engineering principles to live Python-based projects.

Universities & Boards Department, Government of Sindh

IT Developer

Aug 2025 – Dec 2025

Karachi, Pakistan

- Contributed to the development and maintenance of the official departmental web portal, including job and information sections.
- Assisted in digitization of departmental operations, streamlining file tracking, CM summaries, and workflow automation.
